SOLAR ASSORTMENT MADE EASIER

AN ECLECTIC ASSEMBLAGE OF SOLAR SOLUTION!

EMMVEE SOLAR KIT

Emmvee is an intelligent solar solutions producer born from an idea to implement green energy to better use. We aim at providing universally designed products to support all kinds of contemporary and sustainable living. Amidst our industrial product range, Photovoltaics and Solar Water Heating Systems are our strongest since inception in 1992.

What if you could DIY the set up of your Solar Kit without the help of a middleman?

It is now possible with Emmvee's Solar Kit Module. The launch of our solar kit is aimed at reducing the time, cost and manpower involved in solar system installations in Indian homes. This solar kit will need two people for installation and are available in 1-5 KW range. Emmvee Solar Kit is an assorted package of all the essentials you will need to assemble and run your solar energy system.

STABLE POWER GENERATION

Since each AC module operates independently, the performance of the modules will not be affected by the modules that are in the shade. This enables efficiency in harvesting more energy per KW of sunshine.

The performance remain unaffected by the shaded module's performance
